

S2Biom Project Grant Agreement n°608622

D6.1 Policy database

June 2015

Final update November 2016

About the S2Biom project

The S2Biom project - Delivery of sustainable supply of non-food biomass to support a “resource-efficient” Bioeconomy in Europe - supports the sustainable delivery of non-food biomass feedstock at local, regional and pan European level through developing strategies, and roadmaps that will be informed by a “computerized and easy to use” toolset (and respective databases) with updated harmonized datasets at local, regional, national and pan European level for EU28, Western Balkans, Moldova, Turkey and Ukraine. Further information about the project and the partners involved are available under www.s2biom.eu.

About this document

This report corresponds to (number and name of deliverable) of S2Biom. It has been prepared by:

Due date of deliverable:	M 16
Actual submission date:	M 21 (final update M 39)
Start date of project:	2013-01-09
Duration:	36 months

Work package	WP6 – Regulatory and financial framework to mobilize non-food biomass to biobased products and bioenergy markets
Task	Task 6.1 – Structured overview of regulatory and economic frameworks on EU and national level
Lead contractor for this deliverable	VITO, VTT
Editor	
Authors	Luc Pelkmans, Sabine Kreps, Eija Alakangas
Quality reviewer	

Dissemination Level		
PU	Public	x
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services):	
CO	Confidential, only for members of the consortium (including the Commission Services)	

Version	Date	Author(s)	Reason for modification	Status
1	29/06/2015		First version of the database	
2	15/11/2016		Final update + report	

This project has received funding from the European Union's Seventh Programme for research, technological development and demonstration under grant agreement No 608622.

1 Background

The goal of Task 6.1 was to prepare a structured overview of regulatory and economic frameworks on EU and national level.

Different EU-wide and national/regional policies are playing a role in the mobilization, supply, conversion and end-use of non-food biomass. In terms of policies this mainly refers to agriculture, forestry, nature protection, waste policies, licensing, emission limits, requirements for storage and conversion installations in terms of emissions, efficiency, safety, biofuels and bio-energy policies (demand side), support and labelling of biobased products, public procurement, R&D and innovation (conversion technologies, but also research towards new or improved biomass types), as well as sustainability requirements on specific parts or the entire supply chain.

Taking into account that policy support has been extremely important for the deployment of the bioeconomy, it is useful to have a clear overview of different policies in the participating countries which (may) have an impact on biomass mobilisation and use. These policies can be found in different policy fields, *i.e.* agriculture, forestry, nature protection,..., and they are hardly integrated for energy applications, resulting in arising conflicts between different policy areas. Some Member States tried to embed some of these conflicts in policy, however, all followed their own approach in terms of restrictions of scale, limitations to specific types of biomass eligible for support, protection of existing biomass based sectors, and specific sustainability criteria. Common sustainability criteria are only followed in terms of environmental sustainability of biofuels for transport and bioliquids for stationary bioenergy, as imposed by the Renewable Energy Directive (RED, 2009, and Amended by the iLUC Directive in 2015). The good agricultural practices prescribed in the Common Agricultural Policy are also relevant to mention in this respect.

Meanwhile the concept of resource efficiency was presented by the European Commission in the 'Roadmap to a Resource Efficient Europe' (COM(2011)571), followed by the 2012 Commission's strategy and action plan 'Innovating for Sustainable Growth: a Bio-economy for Europe' (COM(2012)60) in which focus is put on materials, rather than energy. Taking these into account next to the renewable energy targets, it is even more important to implement the right balanced and integrated policies (*i.e.* taking into account different policy fields), aiming for a sustainable and resource efficient mobilization and use of these biomass resources, while keeping a level-playing field with other markets (*i.e.* avoiding market distortions through subsidies to one application).

In order to benchmark the different approaches and to evaluate their current and expected impact towards future renewable energy targets, but also in the frame of biobased economy evolutions, it was important to first map what policies already exist with relevance to the main biomass value chains.

EU-wide and identified national and regional policies were structured and entered in a database. The database was built on the foundations developed by a concurrent project BERST¹ (BioEconomy Regional Strategy Toolkit).

On the one hand, distinction of policies and economic mechanisms were made according to the stage in the supply chain they are applied to:

- Biomass mobilisation: this includes production, harvesting and collection of biomass. Supply of biomass comes from agriculture, forestry, nature conservation, as well as waste and residues.
- Conversion/ production processes of biomass to solid, gaseous, liquid biofuels and biobased products.
- Logistics, storage and trade.
- End use: conversion to electricity, heating and cooling; use of biofuels in transport; use of biobased products in end use markets.

On the other hand, policies were classified according to their nature, i.e. economic, regulatory or soft (voluntary).

2 Overview of the S2BIOM policy database

The S2Biom policy database is available at <https://s2biom.vito.be/>. It is a catalogue of policy instruments and measures, information on the regulatory and financial frameworks impacting bioeconomy development throughout Europe.

For each policy measure / instrument, information is provided on a set of descriptive criteria. These are displayed in the form of factsheets.

2.1 Factsheets and input fields

Figure 1 shows a screenshot of the layout of the database for the Austrian CHP law, where the different items of the policy are described.

¹ <http://www.berst.eu/>

The screenshot shows a web browser window with the URL <https://s2biom.vito.be/node/890>. The browser's address bar also shows a tab titled "Factsheet: Combined heat ...". The website has a green header with the "S2BIOM" logo on the left. On the right, there is a login section with fields for "Username or e-mail" and "Password", and buttons for "Create new account", "Request new password", and "Log in". Below the header, there are two navigation buttons: "About S2BIOM" and "Catalogue of Instruments & Measures".

Factsheet: Combined heat and power law

Combined heat and power law

Key Information

Country/Region:
European Union > AUSTRIA (ÖSTERREICH)

Full name of Instrument & Measure (English):
Combined Heat and Power Law

Full name of Instrument & Measure (native language):
KWK - Gesetz

Description:
This federal act regulates the uniform distribution of subsidies for combined heat and power facilities. The act promotes the financial support for the modernisation of existing facilities as well investment subsidies for new CHP facilities. The regulatory structure in Austria has long supported CHP. The Austrian Energy Liberalisation Act implemented on 1 December 2000 included the Federal Act providing new rules on the organisation of the electricity sector, "ELWOG 2000" (Electricity Act 2000). This Act enabled the executive laws of the nine Länder to oblige grid companies to purchase electricity from CHP plants, provided that they served public district heating supply. It also stipulated that a minimum payment per kWh to be granted to CHP generated electricity serving public district heating.

Goal/Aim:
support the modernisation of existing CHP facilities as well as investments for new CHP facilities

Type (and subtype) :
Economic/financial instruments > Investment Subsidies
Regulatory (binding) instruments > Purchase Obligation

Sector/Topic targeted:
Energy

Responsible Authority:
Federal Ministry of Science, Research and Economy / Bundesministerium für Wissenschaft, Forschung und Wirtschaft

Status:
In force

Year Instrument & Measure Started:	Year Last Instrument & Measure was last Amended:
2007	2014

Completed by:

Austrian Energy Agency

Completed on:

December, 2016

Advanced Information

Feedstock type targeted:

Agriculture/Horticulture

Aqua/Marine/Fishing (including algae)

Forestry

Industry byproducts

Landscape care

Waste

Product type targeted:

Combined Heat and Power

Value Chain:

Conversion / transformation / processing

Distribution/sales

Efficiency Requirements:

limited to CHP

Figure 1 Example of a factsheet from Austria

Empty fields are not displayed.

An overview of the input fields which can be entered in the database for each policy instrument is described below. Some fields (indicated between brackets) are more relevant for other projects that use the same underlying database (e.g. BERST, BioTrade2020plus).

The Factsheet of the chosen policy mentions:

- the country or region where the policy is applicable
- the name in English and native language
- a brief description
- the type of Instrument or Measure (Economic, Regulatory, Voluntary)
- topic targeted (e.g. energy, agriculture, ...)
- feedstock type targeted
- product type targeted
- part of the value chain
- short name of Instrument / Measure
- reference Code
- goal/Aim

- sector/topic targeted
- status
- connection with EU policy
- (trade relevance)
- impact on regional bioeconomy objectives
- contact references
 - links (can be several)
 - responsible authority + contact (website)
 - company name which completed and month & year when it was completed
 - acknowledgement (if info builds on other projects, e.g. RES-LEGAL)
- advanced information
 - (Secondary goal)
 - Feedstock type targeted (add general feedstock categories, and specifically select specific feedstock types if relevant)
 - Product type targeted (for which product type the measure is relevant)
 - Value chain (for which part of the value chain the measure is relevant)
 - (Enterprise scale)
 - (Connection with national policy)
 - Year I/M started, last amended, ended
 - (*budget*)
- comments
 - Overall comments
 - Environmental sustainability requirements (e.g. GHG, land use, emissions, ...)
 - Efficiency requirements (e.g. CHP requirement)
 - Material hierarchy (e.g. exclusion of certain materials because of other uses)

2.2 Collected policies

In Annex I an overview is provided of the policies of the different countries included in the database. To this end, the information of relevant policies were partly collected in predefined templates that were uploaded or directly filled in the database. The project partners were asked to go through the list of policies for their country and to update them where necessary.

The participating Member States are all the EU28 Member States, the Western Balkan States - Albania, Bosnia, Kosovo, Macedonia, Montenegro, Serbia - and Moldova, Ukraine and Turkey. The list contains some basic information (name, policy field). More information can be obtained through the included link to the factsheet.

The following table shows an overview of the total amount policies in the database (status November 2016), per country, and per policy field.

Table 1 Total amount of policies in the S2BIOM policy database (status November 2016)

Go to the tab Catalogue of Instruments & Measures

Country/Region:

Choose 'European Union' in the first box, and specify the country in the second box. For EU regulations, select 'EU28' instead of a specific country. It is also possible to further drill into a region within a country.

Country/Region

You can also make other selections for the query, e.g.

- type of Instrument or Measure (Economic, Regulatory, Voluntary),
- topic targeted (e.g. energy, agriculture, ...)
- Feedstock type targeted
- Product type targeted
- Part of the value chain

Click on apply

In the table Click on the short name of the I&M that you want to see

Short name of Instrument or Measure	ISO	Country/Region	Type of Instrument & Measure
Biofuel quota	FR	FRANCE	Substitution Obligation, Tax Reduction
Community water policy	FR	FRANCE	Requirements
Environmental code	FR	FRANCE	Requirements, Permitting

You will then see a factsheet with key information, contact references and advanced information

If you wish to update certain information, or create new Instruments/Measures, you need to log in through your account.

1. Create account

See right on the top: click on “create new account”

follow instructions to create an account

2. Log in

'Log in' with your username or e-mail and your password and click on Log in

3. How to update Instruments & Measures in the Database?

a. Access to be database: see introduction

b. In the table Click on the short name on the I&M that you want to update

Short name of Instrument or Measure	ISO	Country/Region	Type of Instrument & Measure
Biofuel quota	FR	FRANCE	Substitution Obligation, Tax Reduction
Community water policy	FR	FRANCE	Requirements
Environmental code	FR	FRANCE	Requirements, Permitting

Go to tab New draft

Change the text in the fields you want to update

Click on '**Save**' at the bottom of the page to save the entered data.

Your adapted I&M will be saved for review.

Once reviewed by the administrator (VITO), the updated factsheet will be published on-line.

4. How to add new Instruments & Measures in the Database?

Go to tab 'Add Instruments & Measures'

Fill in at least all mandatory fields marked with a red asterisk *

In subtab **Key Information**:

- **Short name of Instrument / Measure***
- **Reference Code**
- **Country/Region*** (you can drill down to NUTS 3 level if needed)
- **Description***
- **Goal/Aim***
- **Type of instrument*** (you can add several)
- **Sector/topic targeted***
- **Status***
- **Connection with EU policy**
- **(Trade Relevance)** (mainly important for the BioTrade2020+ project)

Add Instruments & Measures

An Instrument or Measure can be broadly interpreted as a policy, law, method, mechanism or action, used by governments, the profit or non-profit sector or society as a whole to boost the development of biobased economies.

Instruments and Measures can address e.g.;

- i. information and education (e.g. awareness campaigns, training, skill building,...)
- ii. economic and financial instruments (e.g. support schemes, subsidies,...)
- iii. research, development and deployment activities (e.g. research clusters, research agenda's,...)
- iv. regulatory (binding) instruments (e.g. legislation, policy,...)
- v. voluntary (non-binding) initiatives (e.g. position papers, strategies,...)

You can submit as many Instruments and Measures as you like. Fields marked with '*' are required others are optional.

Key Information

Short name of Instrument & Measure *

Please provide a short name (quick reference) for the Instrument & Measure you are submitting

Reference Code

And add relevant information in the following subtabs: to do so click on the successive tabs and fill in the respective fields (as far as relevant).

Subtab *Impact on regional bioeconomy objectives:*

(Mainly relevant for the BERST project)

Subtab Contact References

- **Full name of Instrument & Measure** (English – native language)
- **Links** (you can add several)
- **Responsible authority + contact** (website)
- **Completed by ...** (company name) **& on ...** (month & year)
- **Acknowledgement** (if you build on info from other projects, e.g. RES-LEGAL)

Subtab Advanced information

- **(Secondary goal)**
- **Feedstock type targeted** (you can add general feedstock categories, and specifically select specific feedstock types if relevant)
- **Product type targeted** (click for which product type the measure is relevant)
- **Value chain** (click for which part of the value chain the measure is relevant)
- **(Enterprise scale)** (mainly for BERST)
- **(Connection with national policy)**
- **Year I/M started, last amended, ended**
- **(budget)** (mainly for BERST)

Subtab Comments

- **Overall comments**

- **Environmental sustainability requirements** (e.g. GHG, land use, emissions, ...)
- **Efficiency requirements** (e.g. CHP requirement)
- **Material hierarchy** (e.g. exclusion of certain materials because of other uses)

Click on '**Save**' at the bottom of the page to save the entered data.

Your I&M will be saved for review.

Once reviewed by the administrator (VITO), the factsheet will be published on-line.
